AMENDMENTS TO THE CLAIMS

1-20. (Cancelled)

21. (Previously Presented) A pressure-sensitive adhesive material or a sealing

material which has a three-dimensional structure and a defined cross-sectional contour,

wherein said material is produced by polymerization of a polymerizable mass comprising at

least one compound selected from the group consisting of aromatic (meth)acrylates, alicyclic

(meth)acrylates, polycyclic (meth)acrylates, heterocyclic (meth)acrylates, di-, tri- and higher

(meth)acrylates, epoxide acrylates, epoxides, vinyl ethers, vinyl esters, and styrene,

wherein said material is present in a form of strings, strands or strips having a round,

semicircular, oval, elliptical, triangular, quadrangular, polygonal or irregular cross-sectional

contour and a thickness of 0.5 to 50 mm.

22. (Previously Presented) The material according to claim 21, wherein the

compound is selected from the group consisting of benzyl (meth)acrylate, phenyl

(meth)acrylate, phenoxyethyl (meth)acrylate, tetrafurfuryl (meth)acrylate, and isobornyl

(meth)acrylate.

23. (Previously Presented) The material according to claim 21, wherein the

compound is selected from the group consisting of hexanediol di(meth)acrylate, trimethyfol-

propane tri(meth)acrylate, pentaerythritol tetra(meth)acrylate, hydroxyethyl (meth)acrylate,

and 2-aminoethyl (meth)acrylate.

(Previously Presented) The material according to claim 21, wherein the vinyl .24.

ester is vinyl acetate.

25. (Cancelled)

26. (Previously Presented) The material according to claim 21, wherein the epoxide

is based on bisphenol A.

27. (Previously Presented) The material according to claim 21, wherein the epoxide

acrylate is a homopolymer of glycidyl (meth)acrylate.

28. (Previously Presented) The material according to claim 21, wherein the

polymerizable mass comprises 0.5 to 5 %-wt. of a radiation-sensitive initiator.

29. (Previously Presented) The material according to claim 28, wherein the

radiation-sensitive initiator is selected from the group consisting of 2-hydroxy-2methyl-1-

phenyl-1-propanone, 1-hydroxy-cyclohexyl-phenyl-ketone, iodonium, (4-methylphenyl)[4-(2-

methylpropyl)-phenyl]hexafluorophosphate(1-), 2-benzyl-2-(dimethylamino)-1-[4-(4-morpholinyl)phenyl]-1-butanone, a mixture of 50%-wt of 1-hydroxy-cyclohexyl-phenyl-ketone and 50%-wt of benzophenone, bis [2,6-difluoro-3-(1H-pyrrol-1-yl)phenyl]titanium, phosphine oxide phenyl-bis-(2,4,6-trimethyl benzoyl and 2-hydroxy-1-[4-2(hydroxyethoxy)phenyl]-2-methyl-1-propanone.

- 30. (Previously Presented) The material according to claim 21, wherein the polymerizable mass comprises 0.1 to 10 %-wt. of at least one inorganic filler.
- 31. (Previously Presented) The material according to claim 21, wherein the polymerizable mass comprises 0.1 to 10 %-wt. of at least one flame-proofing agent.
- 32. (Previously Presented) The material according to claim 21, wherein the polymerizable mass comprises 0.1 to 2 %.wt. of at least one colorant.
- 33. (Previously Presented) The material according to claim 21, wherein the polymerizable mass comprises 0.05 to 55 %-wt. of at least one cross-linking agent.

34-35. (Cancelled)

36. (Withdrawn) A method of permanently or releasably adhesively bonding of

objects, comprising the step of:

applying the pressure sensitive adhesive materials according to claim 21 between the

objects to be bonded.

37. (Withdrawn) A method of sealing joints or flanged joints or panes, comprising

the step of:

applying the sealing materials according to claim 21 to the joints or the flanged joints or

the panes to be sealed.

38. (Previously Presented) The material according to claim 21, wherein the material

is present as rolled or continuous material.

(Previously Presented) The material according to claim 21, wherein said strings, 39.

strands, or strips have a thickness of 0.5 to 10 mm.

40. (Currently Amended) The material according to claim 21, wherein a ratio of width

to height of said strings, strands, or strips having a quadrangular cross-sectional contour is is is

in a range of 1:1 to 1:3.
